Fertilizer label worksheet

Before buying or applying: copy directions from the exact product.

01 Plant and growing situation

Indoor pot / outdoor container / garden bed

02 Reason for considering fertilizer

Evidence of need or relevant plant-care guidance?

03 Product name

Keep a photo of the full label and directions.

04 NPK and other listed nutrients

N / phosphate (P_2O_5) / potash (K_2O): percentages by weight

05 Intended plants and use

Does the label cover this plant and growing situation?

06 Form and release instructions

Liquid, powder, granule or other; release details

07 Exact labeled amount and unit

Check teaspoons versus tablespoons; use the product measure.

08 Dilution or treated area / container size

Check quarts versus gallons and indoor versus outdoor directions.

09 Frequency and last feeding date

Copy the matching interval, not one from another product.

10 Other fertilizer already present

Include any fertilizer listed in the potting mix.

11 Missing information to resolve

Leave uncertain fields blank rather than guessing.

Follow your product label. This worksheet does not prescribe a fertilizer or dose.

Personal notes stay with you. | US Letter - print at actual size; fit to page for A4.
