Plant-check note

Observe first. A wilted or yellow leaf alone does not explain the cause.

01 Plant name / identity uncertain

02 Date checked / symptom first noticed

03 Affected leaves
Older or newer? One side or all sides?

04 Last watering
When, how and how much?

05 Mix below the surface
Circle: dry / damp / wet / uncertain

06 Drainage and standing water
Check the inner pot, saucer and decorative cover.

07 Recent changes
Move, heating, light or temperature changes?

08 Pest observations
Visible insects, webbing or sticky residue?

09 Photos to keep with this note
Whole plant / affected leaf / pot and drainage

10 Next check or action, and why
Waiting can be the appropriate decision.

11 Follow-up date and observation

An observation aid, not a diagnosis. Match care to the plant and real conditions.

Personal notes stay with you. | US Letter - print at actual size; fit to page for A4.
